

## Patch Notes

Changes in Build Version

**2.17.9**

January 21, 2021

### **Instant Level 50 Advance:**

For many years, getting a Level 50 Advance has been a burdensome chore, requiring sending an e-mail to Customer Support, and waiting until your request was processed. This patch has relieved Captains of that long-standing hassle. Now, activating a Level 50 Advance Token will instantly advance you to Level 50, no waiting required.

### **Anniversary Content is now Live:**

Today marks the Thirteenth Anniversary of Pirates of the Burning Sea, and with it we have enabled Anniversary Content!

### **Game Client Stability Improvement:**

For years, several small, lurking missing textures could crash the Game Client. We have tracked most of these down, replaced them where possible and implemented Load Failure Handling to ensure that the Game Client is more stable.

### **Boarding Time Fix:**

The unusually long Boarding times seen in the wake of the 2.17.7 Patch have been fixed.

### **Known Issues:**

If you have 0 free Econ slots (*either because of no upgrades, or because other characters on your Account are already using all of your slots*), in some parts of the Econ tutorial you need to close and re-open the Economy window for it to allow building the tutorial structure.
